

**Public Notice: Activation of Temporary Water Service Connections**

Activation Date: Saturday, February 23, 2008

The Charter Township of Plymouth Department of Public Works (DPW) will be activating the temporary water service connections that were installed as part of the Sheldon Road Underpass Project. The water service connections will provide temporary water service to the City of Plymouth. Temporary water service to the City of Plymouth is required to allow for project work related to the removal and replacement of the Detroit Water and Sewage Department (DWSD) 36" water main in Sheldon Road to proceed without further delay.

The temporary water service connections to be activated were successfully tested in 2007.

During activation, Township residents may observe minor changes in water pressure and water discoloration. Such changes are not uncommon or hazardous to your health and will be temporary should they occur.

Activation shall occur until completion of the DWSD 36" water main in Sheldon Road, tentatively scheduled for early April 2008.

For questions or concerns, Township residents may contact the DPW during the activation period at the following phone numbers:

Weekdays, 8:00 AM – 4:30 PM: (734) 414-1443; and

Weekends and during other non-business hours, call the Plymouth Township Communication/Dispatch at (734) 354-3248.
